### 1. INTRODUCTION

#### STATUS

---

Analysing different sources like WB and International Custom organization show that not much has been done in developing border crossing guide for TRACECA corridor basis except IRU efforts..

#### THE GOAL

---

The goal is to create a TRACECA Border Crossing Guide “BCG”, which can start from simple data and grow into a full size booklet / tool containing a set of information and forms assisting in prepared border crossing along TRACECA corridor.

#### COMPONENTS

---

**TRACECA BORDER CROSSING GUIDE** may consist of 3 main parts

- 1) ***TRACECA BORDER CROSSING POINTS CATALOG (inventory)*** – the list of BCP country-by- country with most general information
  - a. name, type of BCP,
  - b. mode of transport allowed at this BCP,
  - c. type of controls apply at this BCP,
  - d. working hours
  - e. Etc.
- 2) ***TRACECA BORDER CROSSING GUIDE*** –the information, instructions and types of required docs country-by- country. This document will be divide it on two components

##### ***CHAPTER A: Border Crossing Requirements***

- a. General Requirements on Country’s Exit, Entrance and Transit for all transport modes
- b. Regulations on export /import / transit regimes for all transport modes
- c. Most common Requirements of control types like immigration, customs, phytosanitary, health, etc.

##### ***CHAPTER B: Border Crossing Set-of-Docs***

This chapter will consist of the copies of document and forms required under the different types of control and indicated at the Chapter A.

- 3) ***TRACECA BORDER CROSSING TECHNICALITIES - specifications of the*** Border crossing procedures ***at the BCP country-by-country, scheme of BCP, any specific requirements, etc.*** This may include as disaggregated details depending on the border crossing and degree of disclosing of this information.

***This document is an initial drafted for the guide and subject to further improvements***

---

It is advisable to focus on issuing the BCP CATALOG, and to first release it. On parallel track, works can be progressing on the BC Guidelines. This document is a living document and needs to be reviewed continuously.

## 2. FILLING-IN INSTRUCTIONS

### 1. TRACECA BORDER CROSSING POINTS CATALOG

Filling in forms for TRACECA border crossing points catalog does not require much effort and descriptive information. The table presented below is unified for all TRACECA member countries. To fill in this table it's necessary to put "+" in the corresponding graph of the table. If there is a need to add any other information, please specified it after the completed table. We understand that the approach to classification and systematization of the BCP may vary from country to country, therefore the table contains only most common characteristics.

#### UNIFIED TABLE: BCP CATALOG.

№	ID	Name of BCP	Name of Interfacing BCP	Working Hours	Type of BCP		Mode of BCP								Types of Control											
					International	State-to-state	Local	Rail		Road		Sea		River		Pedestrian	Border Guards	Passport	Customs	Sanitary	Veterinary	Phytosanitary	Quarantine	Ecology	Traffic Police / service	Other
								Passengers	Cargo	Passengers	Cargo	Passengers	Cargo	Passengers	Cargo											
n																										

Where,

**№** - serial number of the BCP at the border section (between two countries)

**ID** – international identification code of the BCP

**Name of BCP** – name of the BCP

**Name of Interfacing BCP** – name of BCP from side of neighbouring country

**Working Hours**– open time/schedule of the BCP, if the BCP operate round-the-clock please indicate as "24 h", if not – indicate time framework.

**International Type of BCP** – individuals and means of transport from any counties are allowed at the BCP

**State-to-state Type of BCP** - individuals and means of transport from country of origin and neighbouring country are allowed at the BCP

**Local Type of BCP** – individuals and means of transport of individuals from trans-border area are allowed at the BCP

**Mode of BCP** – is a mode of transport allowed at the BCP (rail, road, sea, river (ports) or several modes at the same BCP), and type of transportation (passenger, cargo or both)

**Types of Control** – here is listed compulsory type of controls at the border. If the system of "one stop" or "single window" or other is operated at the BCP (or country) please note this below the completed table. The details of operation of these systems shall be explained as well (desirable to specify the basic principles of this system in a national context and to provide its characteristics).

The example of completed table for the border section is attached (**ANNEX 1**).

The draft of the content of the TRACECA border crossing catalog is putt in **ANNEX 2**.

In the list of border section there are a sea/river segments (Black sea, Caspian sea, Danube river) – for this case, please provide the characteristics of the BCP at the sea / river ports.

## 2. TRACECA BORDER CROSSING GUIDE. BORDER CROSSING REQUIREMENTS.

As noted above, this part of TRACECA border-crossing guide consists of the information of country level, enlarge on all BCP and all type of formalities and type of control at the border crossed by individuals, any mode of transport and carriage of goods. .

The unified tables for country exit/entrance/transit are needed to be completed (see below).

If any of the Control Services in your country does not provide a functions stipulated in a table please note this in correspond graph (Example: Passport control is not require the documents on transport vehicle).

We ask you to provide the most complete information and copies documents, forms required of different control services s for crossing the border, or links to download them.

The draft of content of the part 1 «Border Crossing Requirements» of the TRACECA BORDER CROSSING GUIDE is attached (**Annex 3**).

### UNIFIED TABLE: EXIT FROM THE COUNTRY

Country:

1. Passport control		
Responsible Authority		
Duration		
Required documents for individuals	From country citizens	From foreign citizens:
Documents, required for means of transport	For road vehicles	For rail
2. Customs control		
Responsible Authority		
Duration		
Control for Goods, Exported by individuals	Resident Individuals	Non-resident Individuals
Control for the Exportation of Goods by road transport		
Exportation of Goods under a TIR Carnet	❖	
Goods, Exported Temporarily under Cover of an ATA Carnet		
Goods, Exported without a TIR or ATA Carnet		
Control for the Exportation of Goods by rail transport		
Control for the Exportation of Goods by sea transport		
3. Veterinary-Medical control		
Responsible Authority		
Duration		
Subject of control		
Type of Control covers:

<b>Duration</b>	
<b>Subject of control</b>	
<b>Type of Control covers:</b>	
<b>Required Documents</b>	

The vehicles moving to the state territory of one Party through the state territory of another Party are subject to transport (motor) control border crossing points (BCP) situated on the outer boundary of the Customs Union in compliance with the state legislation of the Party allowing the given vehicles to pass via its territory and pursuant to Articles 4–6 of the present Agreement.

Check-up of vehicles, documents required for the purposes of transport (motor) control and official registration of its results shall be performed in compliance with the legislation of the Party to be crossed by these vehicles on the outer boundary of the Customs Union and pursuant to the present Agreement.

Transport (motor) control authorities mutually recognize the documents drawn up by the results of transport (motor) control.

Transport (motor) control authority of the Party allowing vehicles to cross its state border and to enter the single customs territory of the Customs Union (hereinafter – territory of the Customs Union), at border crossing points besides transport control envisaged by the legislation of the given state performs:

- 1) 1) verification of compliance of the requirements for weight and sizes of motor vehicles with the standards similar to those established by the legislation of the other Parties, through the territories of which the transit is performed, as well as – to the data indicated in special permits for carriage of wide load and/or heavy-weight cargo, or for the passage of wide load and(or) heavy-weight motor vehicles through the territories of other Parties' states;

- 2) verification of the availability of carriers' permits for transit across the territories of other Parties' states, through which the transit is performed, their compliance with the type of operation and compliance parameters of motor vehicles with the requirements envisaged by such permits;

- 3) verification of the availability of carriers' special permits for carriage of wide load and/or heavy-weight cargo, for transit of wide load and/or heavy-weight motor vehicles, as well as special permits for carriage of perishable goods across the territories of other Parties' states through which the carriage or the transit is performed;

- 4) verification of the availability of carriers permits (special permits) for carriage to the third countries (from the third countries) to the territories of other Parties' states through which the carriage is performed;

- 5) issuance of a registration coupon to the carrier according to the form approved by transport (motor) control authorities in the event that according to the legislation of other Parties' states the carriage is allowed without permits for transit through the territories of other Parties' states, and in the event that the carriage is performed pursuant to the multilateral permit.

When a motor vehicle exits through the outer boundary of the Customs Union transport (motor) control authorities shall in addition to the actions given in Article 4 of the present Agreement carry out the verification at border crossing points:

1) the carrier shall have the coupon for payment of charges for a vehicle transit along the roads of the Parties' states, through the territories of which the transit was accomplished, in the event that the payment of such charges is necessary in accordance with the legislation of the Parties' states;

2) the carrier (driver) shall have the coupon, acknowledging the payment of a fine for violation of the order of performance of international road operations in the territory of the Party's state or the court decision on satisfaction of a complaint about imposition of the corresponding official reprimand on the carrier (driver) in the event that the permit for transit through the territory of a state of one of the Parties or the registration coupon has a note of the transport (motor) control authorities about the imposition of such fine upon the carrier (driver);

3) operators of vehicles of the Parties' states shall have an admission to perform international road traffic;

4) operators of vehicles shall have necessary documents in the event of receipt of a notification indicated in article 6 of the present Agreement from the transport (motor) control authority of another Party.

When establishing in the course of control envisaged in Article 4 of the present Agreement of non-conformity of the vehicle's checked-up parameters, lack or non-conformity of the documents provided by the legislation of the Parties' states, the transport (motor) control authority of one Party issues to the driver the notification according to the form approved by the transport (motor) control authorities of the Parties which contains the information on:

- the established non-conformities;
- the necessity to receive the missing documents before the entry to the territory of another Party's state;
- the nearest border crossing in view of the vehicle passage route within the transport (motor) control authority of another Party, whereat the carrier shall produce evidence of removal of non-conformity of the vehicle's monitored parameters and (or) the documents given in the notification.

The information on the issuance of the notification shall be sent to the transport (motor) control authority of another Party and put into the database of the transport (motor) control authority, which revealed non-conformity.

In the event of issuance of the notification to the carrier by the transport (motor) control authority of one Party in accordance with the present Article, the transport

(motor) control authority of another Party at border crossing point is entitled to verify the execution of this notification and if there are certain grounds - to apply measures with regard to the carrier (driver) in accordance with the legislation of the state of another Party.

Exit of a vehicle from the territory of the Customs Union shall not be performed before showing by the carrier of the documents envisaged by Articles 4 and 5 of the present Agreement.

The transport (motor) control authority of one Party shall inform the transport (motor) control authority of another Party on finding of the non-conformity of the monitored parameters of the vehicle, lack or non-conformity of the documents envisaged by the legislation of the Parties' states, when a vehicle going from the territory of another Party state exits through the external boundary of the Customs Union.
